## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/17/2008 has been entered.

### ***Response to Arguments***

Applicant's arguments with regard to Claims 1, 3-5, and 7-37 are persuasive.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**Claims 9-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.**

The claims do not produce a tangible result, that is, the calculations result in a cipher, which is not directed to a tangible result. The claim appears to be reduced to a mathematical calculation, and does not express state the purpose of the calculation (i.e. producing signature similar to Claim 1).

**Claims 1, 3-5, 7-12, 20-27, and 35-37 are rejected under 35 U.S.C. 101 as directed to non-statutory subject matter.**

The instant claims recite “computer readable medium” which are defined on page 37 as including “communication media”, see lines 18-19.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 13 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites  $\alpha$ , which is a private key, and this key is being generated based on itself. That is, the key is a summation of a product of  $v_i$ ,  $\alpha_i$ , and mod  $m$ . But  $\alpha_i$  vector is never defined.

Claim 13 recites  $m$ , but fails to define what  $m$  is. That is,  $m$  is defined as order of torsion points as recited in Claim 1, but is not included in the recitation of Claim 13.

### ***Allowable Subject Matter***

Claims 1, 3-5, and 7-37 are allowed over the cited prior art.
